

Introducing our MasterGrade™ GH milling bit

elementSIX™

DE BEERS GROUP

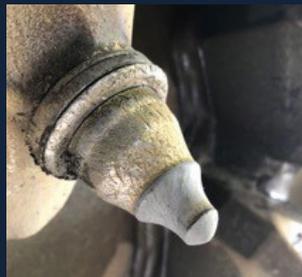

Superior performance. Extended tool life. Improved reliability.

Introducing the Element Six MasterGrade™ GH* road milling bit. Specially designed for tough applications where body wash is a problem. Our GH bit is manufactured to the same high quality standards you know to expect from Element Six.

The Element Six MasterGrade™ GH bit offers:

- A large carbide cap that provides protection to the steel body
- Element Six proprietary MasterGrade™ carbide
- Improved hardened washer for better wear and holder protection
- Full sleeve retainer designed for superior holding

About MasterGrade™

MasterGrade™ bits use Element Six's proprietary 'Nano-technology' to enhance the cobalt binder matrix and optimize the bit's toughness. These innovative carbides result in a versatile bit that offers greater wear resistance, improved tool life and increased operating efficiency.

*Patent pending
